1996	1.38	3,017	23
1997	3.67	1,131	99
1998	2.60	1,590	84
Population Density Peer Group Ratio (1998):		1,879	
Kansas Ratio (1998):		1,854	

### Population to Primary Care Physician Ratio Based on 1998 Licensure Survey

### Underserved Area Designations

#### Federal Health Professional Shortage Areas (HPSA)

Primary Care HPSA?	Whole County
Dental HPSA?	Whole County
Mental Health HPSA?	Whole County

#### Federal Medically Underserved Areas (MUAs) and Medically Underserved Populations (MUPs)

MUA/MUP Designation? *Partial County*

#### Kansas Medically Underserved Areas (KMUA)

KMUA Designation? *Not Designated*

#### Rural Health Clinic (RHC) Eligibility

RHC Eligible? **Yes**

### Primary Care Clinics Targeting the Medically Underserved

None

Data Sources: Office of Health Care Information and Office of Local and Rural Health, Kansas Department of Health and Environment (1996 - 1999); Kansas Association for the Medically Underserved (1999)

#### User Notes:

1. FTE: Full-time equivalent
  2. Primary care physicians include the following specialties: Family practice, General practice, Internal Medicine, Obstetrics, Obstetrics & Gynecology, and Pediatrics.
  3. Refer to the *County Health Profile User's Guide* for complete definitions and further explanation of these statistics.
- \* No primary care physicians are practicing in this county. County is assigned a rank of "1" for ratio and ratio is not depicted on graph.

# Primary Care Access: Primary Care Physicians 1998

**Primary Care Physician FTEs**

In 1998, there were 1,373 primary care physician FTEs in Kansas.

Counties are grouped into quintiles. For example, counties labeled as "High" are among the 20% of Kansas counties with the highest number of primary care physician FTEs.

**Population to Primary Care Physician Ratio**

In 1998, Kansas had a ratio of 1,854 persons per primary care physician FTE.

Counties with no primary care physician FTEs have been assigned to the "High" group for the purposes of this map.
