User Notes:

1. FTE: Full-time equivalent
 2. Primary care physicians include the following specialties: Family practice, General practice, Internal Medicine, Obstetrics, Obstetrics & Gynecology, and Pediatrics.
 3. Refer to the *County Health Profile User's Guide* for complete definitions and further explanation of these statistics.
- * No primary care physicians are practicing in this county. County is assigned a rank of "1" for ratio and ratio is not depicted on graph.

County Health Profiles are produced by the Office of Local and Rural Health, Kansas Department of Health and Environment (1999).

Primary Care Access: Primary Care Physicians 1998

Primary Care Physician FTEs

In 1998, there were 1,373 primary care physician FTEs in Kansas.

Counties are grouped into quintiles. For example, counties labeled as "High" are among the 20% of Kansas counties with the highest number of primary care physician FTEs.

Population to Primary Care Physician Ratio

In 1998, Kansas had a ratio of 1,854 persons per primary care physician FTE.

Counties with no primary care physician FTEs have been assigned to the "High" group for the purposes of this map.
